

Major Software Enhancements in the Auros IQ 10 Release

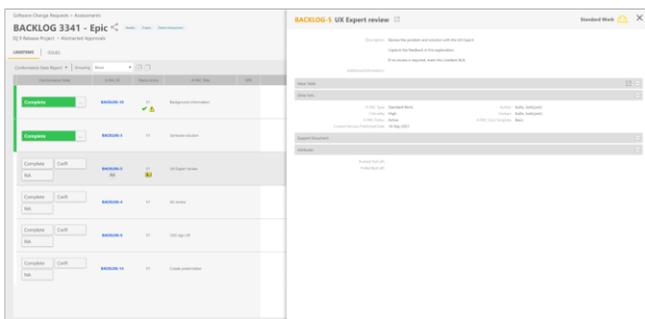

New Decision Models

A new way to model knowledge by guiding a user step-by-step through a decision-making process.

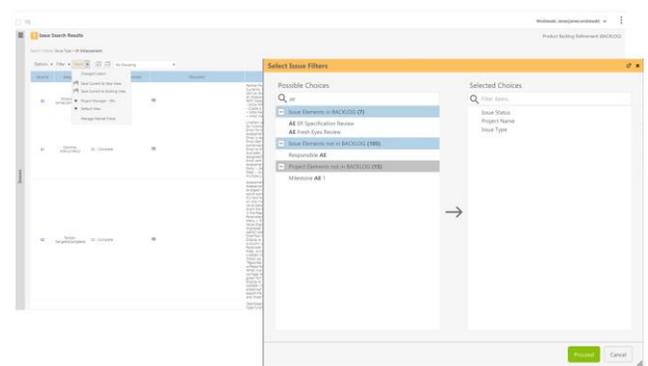

Improved Knowledge Integration

The user experience of consuming knowledge from an Assessment is now easier and more intuitive.

Customized Views Upgrade

With new customizations, and an upgraded interface, finding information relevant to you is now more intuitive.

Other Notable Enhancements:

- New Assessment Status visualization
- Create Method Occurrences in Assessments
- New Global Team hashtags
- Expanded options for assigning Issue Privileges
- Upgraded Assessment Approvals Administration screen
