## The Auros Seed Project

The Auros Seed Project methodology is a proven process for on-boarding new workflows and the process itself is deployed using Auros IQ software. To ensure success, Auros will provide a fully committed and success driven team that will lead the Seed Project process:

- Knowledge Aware Consultant
- Auros Application Engineer
- Business Development Executive
- IT Support
- Auros IQ Software

Seed Project Deliverable

Successful completion of the Auros IQ Seed Project will establish a production ready implementation of Auros IQ for a given workflow and will provide a means for the direct verification of value.

This Seed Project implementation may also serve as the foundation to expand the application of Auros IQ to adjacent workflows through demand driven organic growth.

The Seed Project Charter

The Seed Project Charter defines the specific parameters and deliverables of your Seed Project.

Auros IQ Seed Project Charter

Timing

The Auros Seed Project Process has been developed to achieve production readiness in 15-18 weeks through a proven phase-gate process.

Project and Planning Kick Off	Initial System Configuration	Process Pilot and Evaluation	Project Closure and Production Planning	Transition to Production
2 weeks	8 weeks	3 weeks	2 weeks	0-3 weeks
